

سمینار هفتگی گروه آمار

On the multi-state systems

سفران:

جناب آقای دکتر دوست پرست

دانشیار گروه آمار دانشگاه فردوسی مشهد

زمان:

۴ اسفند ماه ۱۳۹۵ ساعت ۱۰ صبح

مکان:

سالن دکتر بزرگ نیا

خلاصه:

Systems are designed to perform their tasks in a given environment. Some systems can perform their tasks with various distinctive levels of efficiency usually referred to as *performance rates*. A system that can have a finite number of performance rates is called a *multi-state system* (MSS). Here the basic concepts of MMS are discussed. Examples of MMSs are also provided.
